

ACE, SANDBANKS

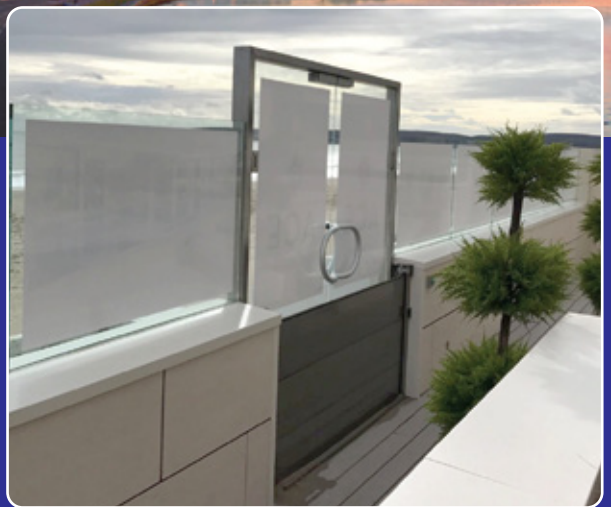

17-21 Banks Road, Sandbanks, Poole

Product: Lakeside Demountable Aluminium Flood Barrier System, 900mm - 1500mm H

Completion Date: December 2016

Located on one of the most desirable stretches of coastline in Great Britain, ACE is a collection of three and four bedroom apartments perfectly positioned between Sandbanks' vibrant harbour and its renowned golden beach.

David James Architects undertook the design, planning and technical design for ACE for renowned nationwide developers PegasusLife.

Due to the prestigious nature of the development and its seafront location, posing an evident threat of water ingress, David James Architects were required to specify a credible, high-quality barrier system. Lakeside were pleased to carry out the works to this landmark new development.

Bespoke Project features:

- Vertical wall-mounted storage units
- Concealment of side posts within cladding
- Joint inter-company working with both Architect and Main Contractor
